

The FLY Lamp is inspired by all biological entities that are airborne. Seemingly defying gravity, it is created to redefine what pendant lamps can be within an interior. Conceived by simply folding a piece of 8 mm thick acrylic with LED illumination placed in the center of the design, FLY is hung in suspended form with its wingtips facing upwards or downwards. With its modular system it can either be displayed as a singular entity or as a collective cluster of flying objects.

Dimensions: D30 x W35 x H14 cm

Primary Material: Aluminum

Primary Color: Bronze

Customization: This product is not customizable.

Voltage: 100-220V

Bulb Type: custom LED strip

Bulb Supplied: Yes

Max Wattage: 6W

Shade Included: No

Certifications: CE, RoHS certificate
