

The lid of the teapot is composed of opaline and glass, fired at high temperatures to produce a galaxy of stars that shines with light, giving the teapot its name. Only when you look closely from the top will you see the stars concentrated at the knob of the teapot lid. The brass handle creates an unexpected contrast with the glass and adds an extra layer of reflection, portraying a dark night sky glittering with light from distant stars.

Available in 2 sizes: Small, Large

Dimensions:

Small: L13 x W22 x H18 cm

Large: L16 x W28 x H24 cm
