

The Rondo IX is a one-of-a-kind bar table made of chestnut wood. The table is sculpted and stack-laminated to create a helical shape, then smoothly carved and finished to achieve a streamlined look.

Masaki Kondo designed this table not by drawing lines but by bringing to life the center point of a circle and its diameter, allowing it to form the shape of the table organically as if a creature is growing from the center.

The table displays a unique silhouette as seen from any angle. It is hollowed inside for weight reduction.

Dimensions: L55 x W55 x H100 cm

Primary Material: Wood

Primary Color: Brown

Customization: This product is not customizable.
