

The image of sunlight spilling over water is a mesmerizing visual. It is where movement meets stillness. The imagination that light inspires is fascinating. The E'motion Wall Lamp was designed to recreate that visual feeling. Like a work of art. Each viewer is given the opportunity to imagine their own captivating visual. When the lights are off, the lamp has a relatively still presence, and when the lights are on, its presence immediately gives way to light and shadow bringing dramatic contrast and movement to the space.

LED 2.8w | 3000K | 100V~240V |  
50-60Hz (without plug)

Dimensions: L50 x W15 x H10 cm
