

The Cuppa 2023 is a double-layered glass vacuum mug that can retain temperatures efficiently. The mug has a plastic outer body featuring trendy colors and a leakproof o-ring inside lid. The anti-slip bottom prevents the mug from toppling over while the large mouthpiece allows for ease of use. The highly reflective surface is achieved by the deposition of pure silver on the vacuum side of the glass inner. It will never touch the contents in a normal flask.

The 280ml highly durable mug is made from non-toxic glass and is BPA-free.

Dimensions: L7.8 x W7.8 x H16.3 cm
