

Our Gold Leaf Paperweight features 23.75K pure gold leaf, meticulously applied by skilled artisans using traditional handcraft techniques. While gold leaf application was traditionally used on wood products, we specifically selected premium Redwood for its rich texture and beauty.

The design cleverly incorporates a groove, allowing it to function as both a paperweight and a phone or name card holder. As a unique gift, each paperweight can be customized with personalized engravings, showcasing not only your taste and elegance but also your appreciation for the artistry of traditional gold leaf craftsmanship.
